## **ROCKY FLATS PLANT PUBLIC INFORMATION MEETING RESUMPTION CODES & STANDARDS AND HEALTH STUDIES**

The U.S. Department of Energy invites you to an information meeting regarding resumption of plutonium operations at Rocky Flats. Issues raised by members of the public at previous meetings will be discussed.

The issues include:

- The applicability of codes, standards and DOE Orders to resumption
- The status of health studies related to Rocky Flats

Plutonium operations were curtailed in November 1989 to make comprehensive safety upgrades at the facility. The U.S. Department of Energy and EG&G Rocky Flats, Inc. have been working to make improvements at the plant and have designated a non-production analytical laboratory (Building 559) as the first facility to resume operations this summer.

Wednesday, May 15, 1991  
7:00 p.m.  
Arvada City Hall, Council Chambers  
8101 Ralston Road  
Arvada, CO

For further information, please contact Beth Brainard, Public Affairs Officer, U.S. Department of Energy, Rocky Flats Office, P.O. Box 928, Golden, Colorado 80402-0928, (303) 966-5993
